researchers at the companies themselves"

## DESCRIPTION

To minimize production downtime, the solution is to prevent it. And the secret is monitoring. This is the inspiration behind MaSH (MACHINE System Health), Galdi's new service designed to guarantee longer lifecycles and fewer downtimes for your filling machine, while keeping it in good health.

How does MaSH work? That's simple. The system constantly monitors the machine health, providing daily reports on its performance and output. It also flags any anomaly or performance drop so as to anticipate potential issues. All data can be easily consulted on a dashboard visible on browser or on smartphones.

## ADVANTAGES

CLEAR INDICATION OF MACHINE PERFORMANCE AT ANY TIME

STATISTICS OF PRODUCTION AND STOPPAGE

IMPROVED PRODUCTIVITY

MINIMIZED PRODUCTION DOWNTIME

COST SAVINGS
