Regular inspections by Galdi’s technical staff are important to establish whether maintenance and/or adjustments are needed. However, they are recommended in all cases regardless of machine-specific maintenance programs. The expertise of our technical staff may help to reduce unexpected downtimes. Galdi’s custom-made proposals are drawn up in line with the customer’s availability and degree of flexibility.

ADVANTAGES

- Overall check of the machine status
- Analysis of maintenance needs
- Reduced unexpected downtimes
