OVERHAULS

DESCRIPTION

Restoring and maintaining Galdi equipment in a serviceable condition is essential. Overhaul involves (1) partial or complete disassembly of the item, (2) inspection to detect damaged, defective or worn parts, (3) repair or replacement of such parts, and (4) reassembly, testing, and trial run prior to returning the item to its full operating level. Old machines can have a “second” life with a complete revamping done by an expert Galdi engineer. Overhauls also allow the machine to be updated in line with the latest technical solutions and advancements.

ADVANTAGES

MACHINE IS RESTORED TO ITS ORIGINAL CONDITION

INSTALLATION OF LATEST UPDATES AND IMPROVEMENTS AVAILABLE

HIGH MACHINE PERFORMANCE
